

Amerindian adults and western adults

Amerindian
Age > 18 yrs

Proportion of Kegg Pathway counts

Western Healthy adults
Age > 18 yrs

Pathway

- ABC transporters
- Aminoacyl-tRNA biosynthesis
- Biosynthesis of antibiotics
- Biosynthesis of secondary metabolites
- Homologous recombination
- Metabolic pathways
- Microbial metabolism in diverse environments
- Nucleotide excision repair
- Purine metabolism
- Ribosome
- RNA degradation
- Other
- Biosynthesis of amino acids
- Two-component system
